

Image Retrieval

This option is only available for Secured Access (requires a secure login to perform the operation).

Using URL for a Delivery Receipt (DR):

```
http://www.estes-express.com/cgi-dta/pdn100.mbr/output?search_criteria=**&search_type=F&doctype=DR&user_name=##&password=$$
```

Using URL for Bill of Lading (BOL):

```
http://www.estes-express.com/cgi-dta/pdn100.mbr/output?search_criteria=**&search_type=F&doctype=BOL&user_name=##&password=$$
```

** = Enter SEARCH CRITERIA (Estes Express Lines PRO Number)

= Enter your My Estes USERNAME

\$\$ = Enter your My Estes PASSWORD

Using XML:

Estes provides a SOAP-based web service for retrieving scanned images.

The WSDL for the web service can be accessed at the following URL:

<http://www.estes-express.com/imageretrieval/services/ImageViewService?wsdl>

The WSDL describes the valid operations for the web service.

The schemas used in the WSDL can be accessed at the links below:

<http://www.estes-express.com/imageretrieval/services/ImageViewService?xsd=availableImagesRequest.xsd>

<http://www.estes-express.com/imageretrieval/services/ImageViewService?xsd=availableImagesResponse.xsd>

<http://www.estes-express.com/imageretrieval/services/ImageViewService?xsd=imagesRequest.xsd>

<http://www.estes-express.com/imageretrieval/services/ImageViewService?xsd=imagesResponse.xsd>

<http://www.estes-express.com/imageretrieval/services/ImageViewService?xsd=imageViewCommon.xsd>

Retrieving the image is a two step process.

1. imageCheck

Request the available images using the PRO number.

The response gives the available image types - Bill of Lading (BOL) and/or Delivery Receipt (DR).

2. imageView

Send a 2nd request with the PRO and image type.

The response contains the image file name and a base64-encoded string representation of the file contents.
