

Transit Times

This option is only available for Secured Access (requires a secure login to perform the operation)

Using XML:

Estes provides a SOAP-based web service for retrieving transit times.

The WSDL for the web service can be accessed at the following URL:

<http://www.estes-express.com/transittime/services/TransitTimeService?wsdl>

The WSDL describes the valid operations for the web service.

The schemas used in the WSDL can be accessed at the links below:

<http://www.estes-express.com/transittime/services/TransitTimeService?xsd=serviceRequest.xsd>

<http://www.estes-express.com/transittime/services/TransitTimeService?xsd=serviceResponse.xsd>

To retrieve a transit time, simply pass the information for both the origin and destination point as defined in the schema.
